## A. CLEANING GAME PAKS

- ▶ Game Paks should be cleaned at least once a month or whenever they become dirty.
1. Remove the cleaning wand from the plastic bag.
  2. With your finger, apply a small amount of water\* to the blue end of the cleaner until it is slightly damp.  
\* If possible, distilled water should be used. OR  
For maximum cleaning effect, use a mixture of 1 teaspoon isopropyl alcohol and 1 teaspoon water.
  3. Rub *both sides* of the Game Pak edge connector by pressing against it gently with the blue end of the cleaner. Move the cleaner side to side to clean all of the edge connector pins. (See Drawing A.)
  4. With the white end of the cleaner, gently dry both sides of the Game Pak edge connector.
  5. Check the connector pins on both sides of the Game Pak. They should be clean and have a shiny gold finish. If not, repeat steps 3 and 4.

## B. CLEANING THE CONTROL DECK

- ▶ The Control Deck should be cleaned at least once a month or whenever dirty. Clean the Control Deck at the same time you clean your Game Paks for best results.

**WARNING — NEVER CLEAN YOUR CONTROL DECK WHILE IT IS PLUGGED IN!**

1. Unplug the power cord from the Control Deck at either the wall outlet (transformer) or the back of the Control Deck.
2. Open the NES cleaning cartridge by gently pressing on the tab on the side and lifting off the lid. Remove the flat Control Deck cleaning card. (See Drawing B.)

## CLEANING CARD

3. Using your finger, apply a small amount of water\* to both sides of one of the long edges of the card until it is slightly damp.  
\* If possible, distilled water should be used. OR  
For maximum cleaning effect, use a mixture of 1 teaspoon isopropyl alcohol and 1 teaspoon water.
4. Reassemble the cleaning cartridge with the damp edge of the card facing out. Insert the cleaner into the Control Deck as you would a Game Pak. Push the cleaner into the down position and move the cleaner in and out 5-10 times. (During the cleaning process, the cleaner will move forward and backward about  $\frac{3}{4}$ ".) (See Drawing C.)
5. Remove the cleaning cartridge and allow the Control Deck to dry for at least 1 hour before plugging it back in and turning it on.

## Additional Hints

- ▶ After cleaning your Game Paks and Control Deck many times, the cleaning surfaces may become dirty. Replace the dirty parts with the replacement parts provided or wash them with liquid dish soap. Rinse the parts very thoroughly and allow to dry.
- ▶ Additional Cleaning Kit parts can be ordered from Nintendo by using the following order form or by calling Nintendo Consumer Service at 1-800-255-3700.
- ▶ The cleaning wand and two extra cleaning tips can be stored in the extra compartments found inside the cleaning cartridge.

## CAUTION

If the Cleaner cartridge becomes locked in the Down position, be sure that the Cleaner cartridge is pushed in all the way and then simply press down on the cartridge carrier as shown, and allow to pop up.
